

Studies Identification

Identification

Records identified through database search (n = 126)

Records removed before screening:

Duplicate records removed (e = 14)

Records for full-text screening after de-duplication (n = 112)

Full-text articles excluded (e = 61)

- Pro-2013 publications (e = 17)
- Non-peer-reviewed sources (e = 15)
- Not related to the research question as per the abstract (e = 10)
- No Visualization figures (e = 18)
- Synthetic or non-legal data (e = 6)

Records included from forward and backward snowballing (n = 14)

Full-text articles assessed for eligibility (n = 60)

Records excluded:

Theoretical discussion without practical implementation (e = 4)
Not related to the research question (e = 5)

Studies Included in the review (n = 51)

- 46 from database screening
- 5 identified via reference snowballing
